Subject: [SPAM] Strengthen the Cleanup Plan for the Willamette River

Harbor Comments,

American rivers and streams have been the dumping grounds of polluting industries for decades. I ask that you design and implement a strong cleanup plan for the Willamette/Portland Harbor Superfund site.

Those who have liability for the PCBs, DDT and other pollutants now in river sediments must meet their community obligation to do the right thing and conduct a comprehensive and timely cleanup.

The Draft Cleanup Plan removes far too little contaminated sediment from the Willamette River. I recommend that at least 1,000 acres of polluted sediment be removed from the river.

The goal of the cleanup must be to end the Fish Consumption Advisory related to pollutants found in the Portland Harbor stretch of the Willamette River for all people. EPA should provide a date by which the advisory will be lifted.
